CSI PL 1701 has been especially developed for use on horses. It provides a protective hair coating against flies while imparting a high sheen to the hair when brushed out. 1 to 2 ounces per head per day gives adequate protection. Apply by either soft cloth or fine spray mist. Only a light application is needed. Avoid using excessive amount. Do not wet skin.

USE TO WIPE ON

First, brush horse to remove dirt and dust. Moisten (but do not wet to the point of dripping) a soft cloth and rub over hair. It is best to apply by rubbing against hair growth. Give special attention to legs, shoulders, shanks, neck and facial areas where flies are most often seen. Do not wet horse's skin or exceed two ounces per application.

After application, brush out thoroughly to bring out bright sheen on the coat. Repeat daily as needed.

USE AS A SPRAY

CSI PL 1701 may be applied as a fine mist at the rate of 1-2 oz. of product per 1,000 cubic feet to stable area and over and around stabled horses for fast paralysis and kill of flies.
